

A9X

Defender

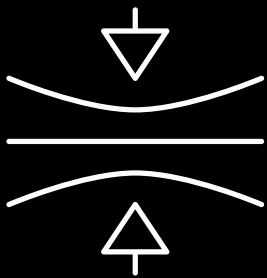

Keeps your computers fully protected from viruses and other types malware, helps meet IMO requirements and makes your I.T Team's job easier.

MAKES REMOTE MANAGEMENT OF ANTI-VIRUS SIMPLE

Automatic, highly optimized anti-virus updates with flexible scheduling for maritime. No configuration or installation required!

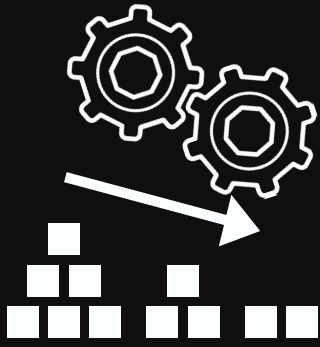

LOW-DATA USAGE FOR MARITIME

Using our own specialized update engine, we achieve a 100-to-1 reduction in data size.

FULL UPDATES, MAXIMUM PROTECTION

Adapted for maritime, unlike other solutions, we provide updates that are optimized without limiting their effectiveness.

UNIQUE, JUST-IN-TIME (JIT) UPDATES

Updates aren't downloaded in a dumb sequential order. They're calculated in real-time upon connection, and based on the remote system. This significantly reduces data-usage.

MINIMUM DISK USAGE

Our unique update engine means we only need to store a single update on the vessel to bring any PC update (regardless of how old). There's no bloated catalog of updates.

PROTECTS ALL WINDOWS VERSIONS

Supports Windows 7, 10, 11, 2008, 2012, 2016 and 2019 server.

REMOTE MANAGEMENT WITH DETAILED REPORTS AND ALERTS

See update status of every compute in Cyber Detective Dashboard. Plus, comprehensive history of all malware detected (date, type and source).
